## 687,000 MEN ARE NEEDED IN ARMY

Drawing for War Service Occurs at Washington.

FIFTY PER CENT ARE EXEMPT

Boards Will Be Directed to Call Double the Number of Their Quota for Examination in the Order Their Figures Appear on District Lists.

Washington, July 20.—Plans for the drafting to fix the order of military liability for nearly 10,000,000 registered men throughout the country were suddenly changed materially and the intricate method of double drawing worked out by officials to lessen the physical task was abandoned.

Instead of a process involving one set of numbers from 1 to 1,000 and another of from 0 to 10 it was found necessary to draw, one at a time, at least 10,263 numbers.

Errors in procedure of local boards in New Jersey and other states caused the change.

Washington, July 20.—Just how the drawing was conducted here, to establish the order of liability for appearance before local exemption boards of each of the 10,000,000 men registered for war service, was disclosed by the provost marshal general's office.

The drawing took place at 9:30 a. m. today in a committee room of the senate office building.

There are 4,557 exemption districts, with an average of about 3,000 registrants in each. The largest has more than 10,000 men registered and the smallest only about 185. In each district each registrant has been given a serial number written upon his card in red ink.

Out of the 10,000,000 registered 687,000 are wanted now for the war army. As it is estimated that 50 per cent of the men called before the boards will be exempted each board will be directed to call double the number of its quota for examination, in order their numbers appear on the district list after the drawing.

General Crowder announced also that local boards will be instructed to call 200 per cent of their quota at the first call to provide for probable exemptions. That means that 1,374,000 men will be notified to appear for examination within the next few days. If more are necessary they will be called for as needed by the local boards in the order provided for in the drawing.

## HOUSE CLERK IS ACQUITTED

Washington Court Finds Jerry South Not Guilty of Assault.

Washington, July 20.—Jerry South, clerk of the house, was acquitted in police court of a charge of assaulting James F. Meegan, a dealer in old books, when Meegan went to the clerk's office to complain about a report that he had demanded pay for returning an old house journal.

## WINSTON CHURCHILL.

His Appointment as British Minister Arouses Resentment.

According to statements of lobby correspondents of London newspapers Winston Spencer Churchill's appointment to the cabinet as minister of munitions has aroused a storm of angry resentment among the Conservatives of the house of commons, while some Liberals also regard it with disapproval.

There is talk of presenting the premier with a signed protest against the appointment.

## Draft will Take Until 3 O'Clock Saturday Morning

(By United Press)

Washington, July 20.—The draft will continue until 3 a. m. at the present rate of proceedings, the announcers being hoarse and slowing down.

Deft, patriotic fingers of scores of loyal Brainerd women will soon be busy, preparing those things which the men who have been wounded in battles of the world war or stricken by illness most require in the hospitals across the water, as well as for the comfort and health of our own soldiers at home and abroad. Each woman is expected to do her bit and it goes without saying that the call will be nobly responded to here.

The different committees of the Brainerd Chapter of the Red Cross have been named and active work will be begun next week.

Headquarters in the vacant room of the Ransford hotel block are being made ready for the sewing circle and those who are actively engaged in promoting Red Cross work in Brainerd are planning with all the little details which must be attended to in order that the work is a success here.

The committees do not by any means take in all the active and public spirited men and women of Brainerd, but have been named as an executive body, and it is expected that every member of the Red Cross, both men and women, will do their part and support these committees. They may be certain that they will be called upon.

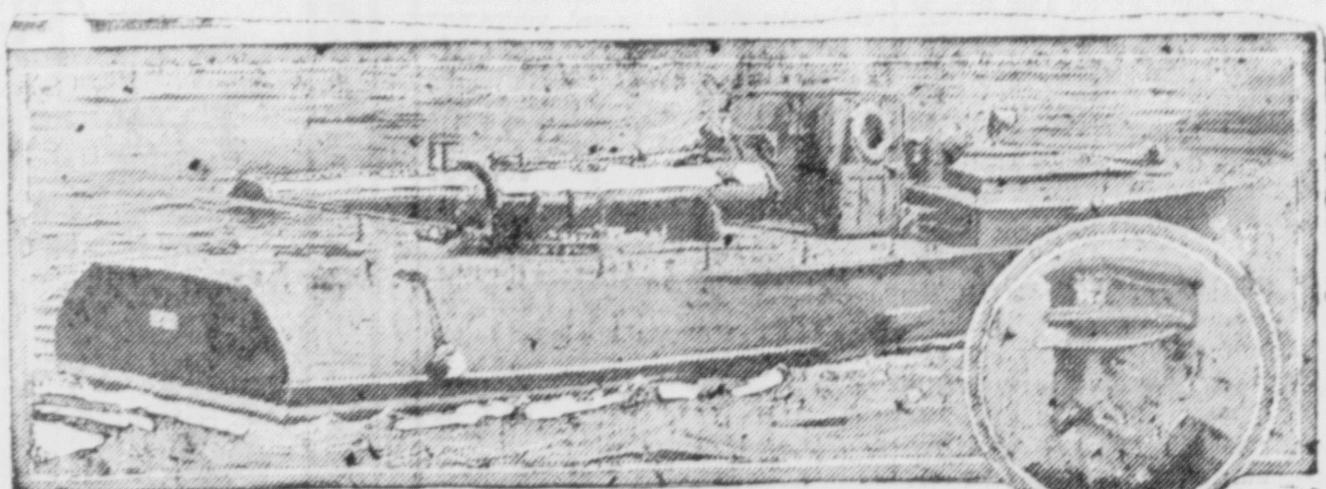

The government is urging prompt action on the part of the Red Cross to relieve the needs of the allies for hospital supplies and comforts. A long list of those things which are needed at once has been sent to the local chapter and the material for bedroom slippers, pajamas, night shirts, socks and also for hospital auxiliaries in the shape of bandages and supplies has been purchased.

The advisory board of the Chamber of Commerce will meet Monday evening, July 23, at 8 P. M. and members are urged to be present as matters relating to the interests of the Chamber and the work before it are to be taken up.

Because of the hot weather, it has been advised that but one regular meeting of the Chamber be held this month and in August and the advisory board has not met for a month.

The different chairmen of committees who make up the board are urged to set aside an hour for the Monday evening meeting and are assured that the work before them will be conducted with dispatch. The board will meet promptly at 8 P. M.

## New American Submarine Chaser Carries Tube on Deck

A new American submarine chaser, more of which are being built under the supervision of J. J. Phelps, a well known yachtman of New York City, who has received a commission of ensign in the United States Navy, carries a torpedo tube on her deck. She will fight the submarine with its own weapon. The torpedo may be launched as quickly as a gun may be fired.

#### HOUSE COMMITTEE WORKING ON REVENUE

Washington, July 20.—The house  
ways and means committee has begun  
work on the war revenue measure.

It will meet daily in an effort to  
reach compromise grounds on many  
contested items inserted by the senate  
finance committee.

One of the items to be contested  
stubbornly will be the reduction of the  
increased income surtax levies con-  
tained in the bill as it passed the  
house.

The committee is not reconciled to  
the excess profits provision, the senate  
whisky, beer and wine system and the  
publishers' tax. Before the commit-  
tee is the task of providing in some  
way for the \$175,000,000 to be asked  
for deficiencies and plans for an addi-  
tional bond issue of \$3,000,000,000 to  
meet future war needs.

Bankers from Western states ap-  
peared before the senate finance com-  
mittee and the house ways and means  
committee to protest against the liquor  
amendment in the food control bill.

La Crosse, Wis., July 20.—Jeanette  
Palmer, thirty-seven years old,  
pointed out Richard J. Shields, a  
prominent business man and politician  
of Superior, Wis., as the man who had  
induced her to go from Minneapolis  
to Superior to open a disorderly house.

Shields is being tried before Fed-  
eral Judge Kenesaw M. Landis  
charged with violation of the Mann  
act.

The Palmer woman testified that  
she met Shields in the street in Min-  
neapolis in May, 1913, and that he  
asked her to go to Superior and con-  
duct a house. The witness said that  
she had known and been intimate with  
Shields for three years prior to the  
time he made the proposition.

## WOMAN'S REALM

### OUR ALASKAN PARK

It Is Classed as One of World's Colossal Spectacles.

#### GRANDEUR OF THE SCENERY.

Mighty Mount McKinley, Most Lofty of All Our Country's Towering Peaks, Crowns the Titanic Glory of the Newest of Uncle Sam's Reservations.

The national park in Alaska which congress created in the spring of 1917 is one of the monster spectacles of the world. To say that Mount McKinley rises 20,000 feet above sea level and that it is the loftiest peak in America is to convey no idea whatever of its grandeur. There are several mountains in the Himalayas which materially exceed its height, one which rises more than 25,000 feet above sea level, and yet Mount McKinley to the observer is loftier than any of these.

The reason is that the greatest Himalayas are seen from valleys 7,000 to 10,000 feet in altitude, while Mount McKinley rises abruptly from valleys 3,000 feet and even less in altitude. The visitor to the Mount McKinley National park will look up more than 17,000 feet to the double peak, the upper 14,000 feet of which are covered with perpetual snow.

This enormous mass is the climax of the great Alaskan range which extends roughly east and west across southeast central Alaska, separating the vast northern inland from the more populated country whose shores are the gulf of Alaska. The range parallels the mighty Yukon many miles to its south.

The reservation contains 2,200 square miles. Its northern slopes, which overlook the Tanana watershed with its gold mining industry, are broad valleys inhabited by enormous herds of caribou. Its southern plateau is a perpetual winter wilderness through which glaciers of great length and enormous bulk flow into the valleys of the south. In this National park, which the railroad now building by government into the Alaskan interior will open to the public, America possesses Alpine scenery upon a titanic scale.

From the stormy south Mount McKinley is wholly inaccessible. But from the plains of the north valleys of easy grade lead one from another to its foot.

"It is an awe inspiring region of massive mountains and ice capped peaks," Belmore Browne of the Campfire club testified before the senate committee on territories. "The Piedmont plateau that follows the range affords a beautiful roadway direct to Mount McKinley, and when you reach the plateau all difficulties vanish and you see a view that is unique on this earth. You see the huge mountain line of perpetual snow, rising like a great wall on the southeast. You can ride a pony to where Mount McKinley rises 17,000 feet above you in a glittering wall of snow and ice. It is flanked by stupendous mountains, which make a wonderful setting for the monster."

North of the vast mountain, however, is a rolling country dotted with beautiful lakes and forests and inhabited by enormous herds of caribou. In fact, the special reason why congress set apart the region at this time was to conserve the wild animal life in advance of the invasion of hunters which the new government railroad will bring into Alaska, the road as projected running within twenty miles of this greatest of nature's spectacles.

Charles Sheldon of the Boone and Crockett club told the senate committee that several times he has counted as many as 500 mountain sheep in a single day of ordinary travel and that herds of caribou numbering from 1,200 to 1,500 are frequently seen.

As a game refuge and breeding ground the new National park conserves Alaskan game which elsewhere is rapidly disappearing. As in the case of the Yellowstone National park, the reservation serves as a perpetual center of game supply for large neighboring areas.

These animals do not greatly fear man, because they have never been hunted. One can approach the great herds of caribou. There are also many Alaskan bears of great size.

An extensive educational campaign has been inaugurated by the department of the interior for the information of the people concerning the hitherto unknown quality and extent of our national parks, of their scenic and recreational possessions, under which public interest in our national parks is growing with unanticipated speed, and public realization, interest and practical use is the condition as well as the object of national parks development. Public patronage of the parks has increased rapidly and steadily.

Co-operation in the public interest has been promoted between railroads and the government, between concessioners and park managements and between parks. Large private capital has been induced to enter several national parks for the enlargement and improvement of hotel and transportation service. Prices to the public have been decreased wherever possible.

When John Ruskin was a professor at Oxford he took his students out to break up stones and make the roads in order to impress upon them the dignity of labor and to improve the looks of the country.

#### ROUND THE LAKE TRIP

Wonderfully Beautiful Automobile Tour Around Mille Lacs Lake

Taken by R. B. Hamilton

Mr. and Mrs. R. B. Hamilton recently made an automobile trip around Mille Lacs lake, finding the roads good around the big sheet of water, one of the largest inland lakes of northern Minnesota, with the exception of some muddy road on the north end. The scenery is superb, said Mr. Hamilton, the road winding around on the bank of the lake.

The speedometer mileage from Brainerd to Garrison and then around the lake and back to Brainerd was 130 miles. Mr. and Mrs. Hamilton then motored to Bemidji, going via Pillager.

#### CENSORSHIP IS 'NOT WISE

Publisher Says Public Should Be Given All News.

Philadelphia, July 20.—Speaking on censorship of war news before the chamber of commerce here Louis Wiley, business manager of the New York Times, said it is absolutely necessary that the country retain its free speech and free press.

He declared that at a crisis when mass opinion must dictate ultimate judgments any restriction which would withhold essential information and enlightenment from all the people could be neither wise nor patriotic.

He emphasized the patriotism of the newspapers and showed by examples since the war "they have faithfully observed the censorship instituted by themselves on themselves."

"The American people are entitled at all times to a full and frank statement of all that occurs, whether it be good or bad," he asserted.

#### LEAGUE TO GUARD CAPITAL

Seeks Compensation for Property Hit by Prohibition.

New York, July 20.—Organization of the National Investors' Protective league to prevent the wiping out of the investment is brewer by prohibition was announced here.

The organization, it is said, is not opposing prohibition, but is seeking compensation for property and will send legislative representatives to Washington and to nearly every state capital in the country.

"There is \$1,500,000,000 invested in brewery securities," the announcement said, "and these are held by 60,000 investors. They have never had any say in legislation."

"With whisky out of the market the saloons would have to close up, for they cannot make a profit on beer. This would wipe out the breweries and their securities would become valueless."

#### SAFETY BODY IS UPHELD

Federal District Court Denies Plea of Saloon Keeper.

Minneapolis, July 20.—The authority of the Minnesota public safety commission was upheld in United States district court when Judge Wilbur F. Booth denied the prayer of Phil Cook, Minneapolis saloon keeper, for a temporary injunction against the members of the commission and against the mayor, chief of police and city attorney of Minneapolis.

He asked that they be restrained from enforcing the provisions of order No. 7 of the commission which closes all saloons at 10 p. m. instead of 11 p. m. each day as a war measure for the public safety and welfare.

#### Goldman and Berkman Appeal.

Washington, July 20.—Associate Justice Brandeis granted Emma Goldman and Alexander Berkman, now serving sentences in federal penitentiaries for conspiracy to impede the working of the army draft law, permission to appeal their cases to the supreme court. These are the first cases involving the draft law to reach the supreme court.

### SYSTEMATIC SAVING PLAN IS DISCUSSED

New York, July 20.—Financiers of nationwide prominence and representatives of the country's greatest industrial organizations discussed here the question of systematic saving among the people of the United States, to bring the government during the war the use of funds that otherwise would not be available. It was virtually decided to form an organization to promote savings, but resolutions bearing on this subject were not made public.

Basil B. Blackett of the British treasury, associated with war savings organizations in his country, describing the work there, said: "This system has met with astonishing success, both in raising funds for the prosecution of the war and in inaugurating a national thrift campaign of great importance. More than 25,000 war savings associations have been formed in Great Britain. Scotland has a separate system."

"Since the outbreak of the war to the close of 1916 the sums invested with the government by small investors amounted to no less than \$290,000,000."

#### AMERICA TO HER ALLIES

I send my men in khaki  
With singing on their lips—  
My engineers and artisans,  
My captains and their ships,  
But yet another sending  
Shall greet your lifted glance,  
When the eagles of America  
Are on the wing to France.

My fierce white eagles,  
They shall gather in their might,  
In hundreds and in thousands  
They shall circle for the fight  
With wings that bear the lightning,  
With eyes that pierce the night.

My soldiers and my sailors  
Shall prove their worth and will,  
My engineers and artisans  
Shall serve you of their skill,  
But yet a greater service  
The four winds shall advance,  
When the eagles of America  
Are on the wing to France.

My fierce, white eagles,  
They shall gather for the feast,  
Like a swift cloud of judgment  
They shall turn them to the east,  
And God shall steel their talons  
For rending of the beast.

### THE GOLD MEDAL

Let folks step on your feet hereafter; wear shoes a size smaller if you like, for corns will never again send electric sparks of pain through you, according to this Cincinnati authority.

He says that a few drops of a drug called freezone, applied directly upon a tender, aching corn, instantly relieves soreness, and soon the entire corn, root and all, lifts right out. This drug is a sticky ether compound, but dries at once and simply shrivels up the corn without inflaming or even irritating the surrounding tissue.

It is claimed that a quarter of an ounce of freezone obtained at any drug store will cost very little but is sufficient to remove every hard or soft corn or callus from one's feet. Cut this out, especially if you are a woman reader who wears high heels.

### CONFESSION CLEARS MURDER MYSTERY

Johnstown, Pa., July 20.—George C. Tompkins, who cleared up the Humphries murder mystery here, did so in a dramatic manner.

According to Jailer Knee, Tompkins was sitting in the office of the jail talking to his wife and his father, when he burst forth saying:

"I killed those three people. I killed them all. I killed Humphries in the cornfield. I bought the pistol in Johnstown."

Mrs. Tompkins began to cry and became hysterical and her husband said no more. Later, it is said, he made a detailed verbal confession to Rev. B. F. Henry, pastor of the Edensburg Presbyterian church, but this confession was not made public.

Tompkins was a member of the Humphries automobile party. Following the shooting he went to the home of a friend and declared that the party had been held up by three masked men. He maintained that the three men shot and killed the members of the Humphries family, but he escaped by falling to the ground near the automobile and pretending that he also had been shot.

#### SENATE MAKING PROGRESS

Food Control Bill Is Approaching Final Form.

Washington, July 20.—The administration food control bill approached final form in the senate.

Under a limited debate agreement the senate approved, 69 to 16, an amendment drafted at joint conferences of Democratic and Republican leaders to limit government control to food, feeds and fuel, including kerosene and gasoline, and vested the administrative authority in three salaried members instead of a single individual.

Although the action will be subject to reconsideration before Saturday's final vote on the bill it is expected to stand and to be accepted by the house in conference.

## We Wish to Give Every Citizen of Brainerd a Copy of "THE WINGS OF WAR"

*This is an interesting little story of what is known as "service of information" in modern warfare. It deals with "the eyes of the army" in former wars and in this present one; bringing out the fact that this world conflict will be won on the wings which America gave to twentieth century civilization.*

- It shows just what control of the airplanes means to an army of defense and of offense; goes into the way in which American aviators helped to give the Allies aerial superiority over the Germans; and continues with a description of the

next great advance in aerial engineering, also the gift of American inventiveness to civilization.

In conclusion, it shows how the people of Brainerd can help the United States to send lighter and swifter aeroplanes over to act as the "eyes of the armies" at the front; at the same time participate in the tremendous profits of a new international industry.

You should receive a complimentary copy of this book some time tomorrow; but, if you fail to get it, please let us know and we will see that you do.

## STREET BLAMED FOR ACCIDENT

Heavy Truck and Touring Car Crash  
at Fourteenth and Oak Streets  
Thursday Afternoon

## MAN AND BABY ARE TOSSED OUT

Truck Owned by Turcotte Brothers,  
Overland Contained Royalton  
People and Baby

Baby slept through it all when tossed out with her father from a car which his wife, Mrs. Bert Kuschel of Royalton was driving on Oak street near Fourteenth at about 2 o'clock Thursday afternoon when a truck of Turcotte Brothers collided with them in a head on collision, as stated by the Kuschels.

Mrs. Kuschel claims she set the brakes when the truck, whose driver she said was dodging chuck holes in the street, ran full tilt into them.

Their Overland had radiator, fenders, etc., practically half the car, smashed. The truck, a big Studebaker, merely strained a radiator.

Mr. and Mrs. Kuschel had been at Riverton visiting his wife's sister and were on their way home. They are guests today of Mr. and Mrs. Ed Slivney.

John Moore, young man employed by Turcotte Brothers, was driving the delivery truck. His story is to the effect that he and the woman driver were equally at fault and that the city also shared in the blame in having a street full of chuck holes.

He said he was traveling to the right side of the street and the woman was making to the left. If she had stayed at her right hand curb, said Mr. Moore, the accident would not have happened.

After the accident, said Mr. Moore, cars passed between the Overland and the curb, which showed, he said, that she had not drawn up close to her right side.

Moore said he was not going over 10 miles an hour and that with Oak street in an almost impassable shape for fast driving, no man could go over 10 miles an hour there and keep his parcels in a delivery truck.

The Overland is being repaired at Rosko Brothers garage and the truck at Clarence A. Olson.

The P. J. Oberst store of this city, has just been advised that the fine window display of Dr. Scholl's Foot Comfort Devices, which many readers will remember seeing in the window of that store during Foot Comfort Week (June 18th to 23rd) was awarded a valuable prize by the judges of the Scholl Window Trimming Contest.

This great honor can only be appreciated to the full when it is considered that this Foot Comfort Week was an event which covered the entire United States and Canada, and that this prize was won in competition with the thousands of window displays which were entered in the contest. Almost every shoe dealer on the continent who gives Dr. Scholl's Foot Comfort service to his customers was in the contest, and the number of such dealers runs into many thousands.

Mr. Oberst, who trimmed the window, is being congratulated by everybody, and is deserving of the honors gained.

Kukko in the Federal Court in  
Duluth, Jury Out Short Time

John Kukko of Southeast Brainerd, who drove Joe Rosko, Jr.'s, team while hauling liquor from one wholesale house to the other and who was arrested February 23 at Brainerd for introducing liquor into dry territory, was declared not guilty after a jury trial in federal court at Duluth before Judge Page Morris.

Judge Morris for the first time in his court, it is said, ruled in keeping with the federal courts of Montana, Washington and Arizona that hauling liquor from a point outside the territory to another point outside the territory and in so doing to pass through dry territory was not a violation of the law.

The case went to the jury on the question of fact whether the liquor was taken through the territory or for transportation to the territory and the jury returned a verdict of not guilty and Kukko was released.

The evidence showed that a direct roadway from the point of origin of shipment at the 13th street wholesale house to the destination at the Dykeman wholesale house was impassable on account of the heavy snow and that driver and team came to Brainerd and took the north road out of town.

Leo Mayer, Indian agent, made the arrest which was claimed to be the largest seizure of liquor in local annals, being 600 quarts.

In October will be heard the condemnation cases against team and wagon of Mr. Rosko and the liquor.

## TROUBLE FOR THE KAISER

Passing through Brainerd today on their way to Jefferson Barracks, Mo., was a group of 13 recruits from Benidji and the fateful number augured no good omen for the German Kaiser.

In the party of husky young men were Frank Lange, Roy Conant, Hiram Grow, Richard Lee, Clarence Worth, Wm. Walker, Fuzzy Johnson, Jule Ackenbaugh, Wm. Barrigan, John Gaine, Ralph Case, Wm. Lappan, Fred Frazer. Of the number Barrigan, Fuzzy Johnson and Walker were members of the Benidji basketball team.

## ROLL OF HONOR

Capt. Ned M. Green, Duluth, recruiting officer, has received word from the adjutant general of the army, to be prepared for active service in the very near future. Just where he will be ordered Capt. Green is unable to say, although he expects to be detailed at one of the cantonments in the south. His regiment the Twenty-eighth infantry, is now with General Pershing in France. Capt. Green is well known in Brainerd, visited the Brainerd Rifle club range and has stimulated recruiting in Brainerd.

A. A. Gieriet, former commercial manager of the Northwestern Telephone Exchange Co., in Brainerd, who recently received his commission as captain in the U. S. Signal Service, left on Tuesday for Fort Leavenworth.

Bernard G. Hommer of Ft. Ripley enlisted in the infantry Saturday at Little Falls and was sent to Duluth.

## BRAINERD'S OLDEST STORIES OF TODAY

One of the meanest robberies on record was sustained at the home of Harry Carlson on the north side where a sneak thief stole from the ice box on the porch four bottles of milk, two dozen eggs, a dozen and a half of prepared meat balls. Harry now sleeps in the room right above the refrigerator and carries a loaded gun under his pillow.

## Helps Asthma and Hay Fever

Now comes the season when hay fever and asthma cause thousands to suffer. "I have been troubled for years with asthma," writes E. C. Schaaf, Creston, O. "and find Foley's Honey and Tar the only thing that gives me relief. It loosens the phlegm so I can throw it off and then sleep." Contains no opiates. H. P. Dunn, Adm.

## TURCOTTE BROS. NOW IN CHARGE

Assume Management of Lum Park  
Dancing Pavilion, Floor to be  
Improved First Thing

## THE FIRST DANCE ON JULY 24TH

Turcotte Brothers Will Advertise Extensively and Bring in Many Range People

Turcotte Brothers have concluded negotiations with Tom Mansuras and associates whereby they have taken over the Lum park pavilion and will hereafter conduct the dances at least twice a week and also rent the pavilion for other engagements.

The dance will be conducted in a way to merit the best public approval and will assure the park of a constantly increasing attendance.

Turcotte Brothers have engaged Ernest Husemann to put the dance floor in fine condition and he will use his electric surfacer on the same and take out any inequalities.

The first dance under new management will be held on Tuesday evening, July 24, with good music in attendance.

Extensive advertising will be carried on so as to bring many of the range people to the dances in automobile parties.

## CROP CONDITIONS

Corn, Gardens, Pastures, Fruit and Potatoes Attaining Good Growth, Says Government

The government crop report, for the week ending July 17, states that while cold weather continued, the rainfall was sufficient and well distributed from the Mississippi river eastward, and corn, gardens, pastures, fruit and potatoes made good growth except that it was too cool near the Great Lakes.

Corn was greatly damaged by drought and high temperature in Texas, Oklahoma, and parts of Kansas. Corn is well cultivated in the central Mississippi and Missouri valley states, but it is weedy in the Upper Ohio Valley. It is tasseling north to central Missouri. Harvesting of grains was delayed by rain from the Ohio Valley eastward, but progressed well elsewhere, and is under way to southern Iowa. Winter wheat harvest is ten days to two weeks behind the average time. Spring wheat and other grains were improved by showers in Minnesota and the Dakotas, but are suffering greatly from Montana westward.

## SCIENCE TESTS LAUNDERING

Clothes Lose in Strength at Rate of Fourth of One Per Cent Each Drying

A very few years ago the Mellon Institute was started at Pittsburgh to enable the study by experts of certain economic problems. In 1911 eleven different investigations were made by twenty-four men and \$39,700 were spent. In five years the subjects increased in numbers to forty-two, the investigators from twenty-four to sixty-four and the sums spent from \$39,700 to \$147,000.

Among the subjects studied were such as: Bread, yeast, glue, soap, bottle glass, soda, gas, coke, oil, collars, paints, fruit-juice, coffee, silvers, ware, cottonseed, toilet articles, flavoring, insecticides, smoke, laundering and many similar ones.

H. G. Elledge, a graduate student of the University of Pittsburgh, was given the opportunity to make many tests with laundering processes, and some results reported by him to the United States Bureau of Standards, at Washington, were printed in brief in the Literary Digest for July 7, 1917. He reported some startling results. Drying on a clothes-line has been found to be particularly injurious to all kinds of textiles; flapping of clothes on the line proved very injurious. The fabric is affected more than anticipated. Clothes lose in strength at the rate of one-fourth of one percent for each drying; a handkerchief exposed for twenty-three days (including 184 hours of sunshine) lost 50 percent of its original strength. This illustrates why lace curtains often fail just at the line marked by the opened sash of the window. Smoke and fumes are injurious, and, where these are abundant, frequent laundering is protection rather than wear of the article.

Regarding collars, Mr. Elledge said that a collar not worn at all can be laundered from thirty-five to forty times, but with ordinary wear twenty trips to a laundry is the limit. He states that most of the severe damage to starched collars is attributable to improper manipulating in putting it on and taking it off.

## 108 IN THE SHADE ALL DAY LONG

Men Being Taught to Swim a Mile and to Float for 15 Minutes—The Camp Routine Given

Corpus Christi, July 11, 1917. Dear Mother:

Will write a few lines tonight to let you know that I am here. Received your letter of June 28th, on Sunday, and the one that you wrote on July 1st on Saturday. I don't want to go to France if I don't go to the trenches but that is about what I will do if we go when we are expected to as I am in the office now and will stay there I suppose. We get up here at 5:30 A. M. The first drill at 5:45 until 6:15, then we have mess, at 6:30 and at 7 A. M. we go out for second drill and get in at 8:15, out again at 8:30 and in at 9:00 out at 9:15 and in at 11:45 and mess again at 12. At 1 P. M. I go in the office or take the captain down town in his auto, and at 3 P. M. we all have to go in swimming and they are trying to teach us to swim one mile and float 15 minutes. I can float the time but can't make the swim yet. We get out from the water at 5 P. M., go to mess at 5:30, out for retreat at 6 and in again at 6:30 which is the day's work unless they can find extra work for us to do like last Saturday, when we unloaded 18 auto trucks after 9 P. M. and got to bed at 3 A. M. morning, and then I had to get up at 6 with the rest and help break the autos in, or in other words, try them out, which was no fun, so you can see that this is no fun when it is about 108 in the shade all day long.

Please get Bill Evans' address from Lory and send it to me.

Well I will close.  
With love,

## ITEMS OF LOCAL BUSINESS WORLD

The Dreg-Don Co. is selling over 100 gallons of ice cream daily. King's, Lammon, Weber and the Brainerd billiard parlors handle this locally made ice cream and say it gives the best of satisfaction.

Home gardens produce finds a ready sale at the Ransford. Andrew Berglund, manager of the hotel, this morning bought five bushels of peas from a garden but a few blocks from the hotel and said they were the finest peas ever supplied the hotel.

That hearty interest in customers, their attention to their every wants in the clothing line, as shown by Herman Linnemann while at the Linnemann store in Brainerd, will serve to make the Crosby branch a most successful store, for Herman is now manager for H. J. out there.

The Dispatch is the only paper in Crow Wing county publishing in full the draft numbers.

Lindbergh, the Scandia Life Insurance man, in June wrote \$39,000 insurance in Brainerd and \$11,000 at Crosby.

Robert Hitch, had selling News Tribunes, sold 25 in an hour yesterday. His nearest competitor is his brother Eugene.

## HAS CONFIDENCE IN SUBMARINES

New German Chancellor Defends War Policy.

## BLAMES CONFLICT ON RUSSIA

Dr. Michaelis Tells Reichstag Slav Mobilization Forced Germany to Unwillingly Take Up Arms and Asserts U-Boats Have Done All That Had Been Expected.

Copenhagen, July 20.—Dr. Michaelis, the new Imperial German chancellor, in his address to the reichstag, declared his adhesion to Germany's submarine campaign, asserting it to be a lawful measure, justifiably adopted and adapted for shortening the war. Dr. Michaelis opened his address with a hearty tribute to Dr. von Bethmann-Hollweg, the retiring imperial chancellor, whose work, he said, history will appreciate.

The chancellor declared that the war was forced on unwilling Germany by the Russian mobilization and that the submarine war was also forced upon Germany by Great Britain's illegal blockade starvation war.

The faint hope that America, at the head of the neutrals, would check Great Britain's illegality was vain. Germany's final attempt to avoid the extremity by a peace offer failed and the submarine campaign was adopted, the chancellor said.

The submarines, the speaker continued, have done all that had been expected and that false prophets who had predicted the end of the war at a definite time had done a disservice to the Fatherland.

## TAKEN OVER BY GOVERNMENT

Enormous Locomotive Works Under Public Control.

Philadelphia, July 20.—The Baldwin locomotive works have been taken under control by the government. All the energies of the enormous plant will be devoted to making engines for use in Europe.

The lines in France to be used by the American troops will be equipped from this plant. The company's property covers sixteen and one-half acres and its foundry and yards at Eddystone, Pa., occupy 225 acres. At East Chicago, Ill., the company has 370 acres and has started an extensive building program there. The company also owns the entire stock of the Standard Steel Works company.

The Baldwin company has a capacity of 7,000 locomotives a year.

## SENATE ADOPTS RESOLUTION

Calls for Information on Ship Building Program.

Washington, July 20.—Congress took note of the ship building row, when the senate passed without debate a resolution offered by Senator Smoot calling on President Wilson to furnish information concerning the government's ship construction program.

The resolution asked for facts from the shipping board on building contracts and awarded or pending, names of contractors and contract prices, together with other information to assist the senate in considering requests for further appropriations.

Another \$500,000,000 for ship construction will be asked, the shipping board announced recently, as soon as its estimates are approved by the president.

## SUCCEEDS DR. E. E. PRATT

Burwell S. Cutler Made Commerce Bureau Head.

Washington, July 20.—Dr. Edward E. Pratt, who resigned as chief of the bureau of foreign and domestic commerce at the request of Secretary Redfield, was succeeded by Burwell S. Cutler, first assistant chief, who will serve until a permanent appointment is made.

Mr. Cutler is a Buffalo manufacturer, who came to Washington at the outbreak of war with Germany to offer his services to the commerce department.

PROMOTIONS COMING SOON

Scott and Pershing May Become Lieutenant Generals.

Washington, July 20.—Revival of the rank of general, which lapsed with the death of Sheridan, and promotion of several major generals to the rank of lieutenant general will be recommended to congress as war measures by the administration soon.

Secretary of War N. D. Baker first will press congress to restore the grade of lieutenant general so that Major General John J. Pershing and Major General Hugh L. Scott, chief of staff and commanding general of all army departments, may be promoted.

Immediate action will be urged to place General Pershing nearer equality with the British and French officers.

TWO AMERICANS TRY TO KILL KAISER.

London, July 20.—The Reuter Amsterdam correspondent says:

"According to information available here, which must, however, be treated with necessary reserve, two Americans

were shot recently on the charge of having attempted to take the life of the German emperor."
